

# Open Access Policies Search

## Custom Google Search

This page is designed to assist with searching across SHERPA/RoMEO, OAKList and AcqWeb simultaneously. CAIRSS would like to credit the idea of this customized Open Access Policy Search to the staff from University of Technology, Sydney Library.

## Requirements

In order to see and use this Google Search bar you will need to have Javascript enabled in your browser. If you see the word "Loading" and can not see the search bar at all enabling Javascript will fix this.

## How does it work

Type a search term in to the Google Search bar above. It will search the following three domains simultaneously and exclude all other domains.

- SHERPA/RoMEO - <http://www.sherpa.ac.uk/>
- OAKList - <http://www.oaklist.qut.edu.au/>
- AcqWeb - <http://www.acqweb.org/>
